MIX FOR RHEUMATISM

The following is a never failing remedy for rheumatism, and if followed up it will effect a complete cure of the very worst cases: "Mix one-half pint of good whiskey with one ounce of Toris Compound and add one ounce Syrup Sarsaparilla Compound. Take in tablespoonful doses before each meal and at bedtime." The ingredients can be procured at any drug store and easily mixed at home.

Better Than Refrigerator. It is well known that food can be preserved without undergoing decomposition for a much longer period in a container, from which the air has been nearly exhausted, than in the customary refrigerator. In a nearly absolute vacuum milk, fish and meat have been preserved for months unchanged without further expense than that of withdrawing 'the air originally present in the receptacle.

With a smooth iron and Defiance Starch, you can launder your shirtwaist just as well at home as the steam laundry can: it will have the proper stiffness and finish, there will be less wear and tear of the goods, and it will be a positive pleasure to use a Starch that does not stick to the fron.

Many have paid the entire cost of their farms and had a balance of from \$10.00 to \$20.00 per acre as a result of one crop. Spring wheat, winter wheat, oats, barley, flax and peas are the principal crops, while the wild grasses bring to perfection the best cattle that have ever been sold on the Chicago market.

Turning to the wheat fields of Western Canada, the editor of the Laurel Neb.) Advocate of Sept. 17th says: "I have often thought that the reason that the characters of Charles Dickens are so impressed upon the minds of his readers is because dwells upon them so long and describes them so minutely that by the time one has waded through his long drawn out stories they are so burned into his brain that he can never forget them. It was this way with the Canadian wheat fields. Had we only seen a few the memory of them might have worn away in time, but a long drawn out experience such as we had is sure to leave an uneffaceable impression. Never while we live shall we forget the Canadian wheat fields. They call it the granary of the British Empire, and we don't blame 'em. Nobedy who has seen these wheat fields can wonder at their enthusiasm." It is worth while to record that these fields have now been harvested, and in many cases yields as high as forty and fifty bushels per acre have been marketed, while the general average has been away above 20 bushels per acre, Oats and barley have also done well, and the profits, the prices of grains being high, have paid the entire cost of the farms of many a farmer. There is now 160 acres of land given away, in addition to the 160 acres that the homesteader may purchase at \$3.00 an acre. Particulars of this as well as the lowest railway rates will be given by the Cana-
